# General Notice and Instructions

Note that forms are classed as either STANDARD, REGULAR or SPECIAL (and a few SYSTEM).

STANDARD forms are such as can be used uniformly by all System Lines; they generally have the word "Santa Fe" as a heading, followed by a dotted line on which the name of the Company may be inserted.

REGULAR are such forms as are used in transacting business with the public or foreign lines. They are exactly similar on all roads, but require the name of the company printed prominently thereon for legal or other reasons, such as waybills and freight bills, vouchers and bills.

(NOTE—Certain "Regular" forms to which suffix letters are assigned, such as freight bills, are printed specially for large stations in quantities to include the name of the station and telephone number.)

SPECIAL are such as are used by one road only, either because only one line has use for the blank or because names of divisions or other information peculiar to one line are printed on the blanks. The same "Special" form may be separately printed for several different lines.

SYSTEM are such as reflect System information and are used in System offices only.

Suffix letters are assigned where blanks are generally similar and serve same purpose but are slightly different, for example: Std. 305, Report of Local Freight Forwarded—Pen; Std. 305-A, Report of Local Freight Forwarded—Machine.

The general purpose of assigning a separate number to each and every form is to have them listed separately so that they may be ordered by number and thus avoid confusion. A blank is supposed to be given a number in the series assigned the department for which it is intended.

If a new form not already assigned a number is wanted, approval should first be obtained from the official who is responsible for the expense, or his delegated authority. For example: Freight Department forms should be authorized by the Freight Traffic Manager; Accounting Department forms by the General Auditor; Engineering Department forms by the Chief Engineer System, etc. Great care should be used in preparing "copy" for new forms so that changes will not be necessary. Written advice of any form discontinued should be given to Stationer.

The number shown at the right of the description is the item number covering the class of records under which the blank form falls as described in the Regulations of the Interstate Commerce Commission Governing the Destruction of Records of Steam Roads; effective XXXXXXXXXX June 1, 1945.

The forms indicated by \* are not carried in Stationer's stock, but only by the Department or Station that uses it. These forms to be ordered on separate requisition from the stock items.

W. J. DUFF,  
Stationer.

Approved:

C. R. HOLMES,  
General Storekeeper.

W. W. KELLY,  
General Purchasing Agent.
